Hands-on Assignments for Object Serialization

Complete the below hands-on assignments before proceeding with the next Topic

No.	Hands-on Assignment	Topics Covered	Status
1	Create a class called Employee with properties name(String),dateOfBirth(java.util.Date),department(String), designation(String) and Salary(double). Create respective getter and setter methods and constructors (no-argument constructor and parameterized constructor) for the same. Create an object of the Employee class and save this object in a file called "data" using serialization. Later using deserialization read this object and print the properties of this object.	Object Serialization & Deserialization	☐
